

## What is the best browser?

Firefox, Internet Explorer, Chrome, Opera, Safari, the list goes on. We've never had as much choice in how we experience the internet as we do now.

How do you pick the the best browser for you?

What browser works best with Facebook? With Twitter? With Hotmail or Gmail?

These are common questions that get asked every day. The answer depends on how you define best. And it's going to be a different answer depending on who your are and how you use the Internet.

## What browser has the best features?

I can't tell you which browser has the best features. Most of the internet would disagree with me on principle, so I'm not even going to try. In fact you should be wary of anyone telling you that their favourite browser is the best one for you too.

You should try all the browsers though. They all have something unique and interesting to offer that could enhance your web experience.

## What is the fastest browser?

Now you're talking our language. At Futuremark, we like measuring and comparing things so we created [Peacekeeper](#), a free and easy to use online tool that quickly tells you how different browsers perform on your PC.

Peacekeeper is designed to measure a **browser's JavaScript performance**. This is important because many modern dynamic websites make extensive use of JavaScript to provide navigation, forms and other features. Changing browsers to one with a [high Peacekeeper score](#) could make these sites faster and more responsive.

Hundreds of thousands of people with all kinds of PCs have taken the Peacekeeper test. Click to [see how the five major browsers compare](#) on average. You might be surprised at the results.

Or [run Peacekeeper yourself](#) and see how the different browsers compare on *your* PC.

## What is the most popular browser?

A popular browser probably has features that lots of other people like. **Choosing a popular browser is always a safe choice** but who knows what you might be missing out on? This graph shows the changing trends in browser use from people using Peacekeeper.

## Where can I download a new browser?

These links will take you to the download pages for the current release and the latest beta build for the five most popular browsers. Most people will be better off **using the stable release** but there are always people, like **us, who like to have the latest of everything**.
